

Evening Lecture, Tuesday 18th. June at RIBA

3.11 and Glocal Design

3.11とグローバルデザイン 〈講演会〉

The impact of the Great East Japan Earthquake Disaster has led to a basic rethinking of the essence of architecture and urbanism. "Glocal Design" is one approach for solving the acute problems that have become apparent. It is a way of thinking that simultaneously integrates the local and the global. Four motivated Japanese architects will give talks.

東日本大震災は、建築や都市の在り方について根本的に考え直す衝撃的な出来事となった。顕在化・先鋭化した問題を解決すべくものとして【グローバルデザイン】がある。これはローカルとグローバルを同時に考える思想であり、復興デザインのみならず、今後のデザインを考える上での切り札的キーワードである。4人の気鋭日本人建築家が語る。

Takeo MURAJI
連 健夫
